HSA 6115 – Introduction to the Management of Health Services Organizations
Spring 2015 (Online)

Instructor

Lynn S. Kiehne, Ed.D. MHA, FACHE
Health Services Research, Management, & Policy
University of Florida
Email: lkiehne@phhp.ufl.edu or lkiehne@aol.com and via the Sakai mail system
Office Phone: (352) 273-6066
Cell: (813) 293-5886
Office Hours: by appointment and can occur via phone, chat, Skype

Required Materials:

3. Additional readings are available on the course’s website: https://lss.at.ufl.edu/

Course Overview

This course is an introduction and overview of the management of Health Care Organizations (HCOs). It is designed to introduce you to the skills and capabilities of professional managers that are essential for all management positions. You will develop the industry specific knowledge you will need to apply these skills in HCOs. Further, you will learn about your own leadership style and how best to utilize your style as work with others, whose styles may differ, through a series of team oriented exercises.

To accomplish these tasks, the course draws upon perspectives from organizational theory and organizational behavior to examine management and leadership topics within the unique context of HCOs. A case study framework will be used that will aid you in learning how to be effective despite often incomplete information, manage competing organizational goals and priorities, recognize that diverse health care professionals often have varying interests and perspectives and
how to best to work with them, and learn how to recognize errors and performance gaps and how to revise actions to address.

**Course Competencies**

1) Use the principles and tools of human resources management, organizational behavior and the leadership of change to achieve organizational goals.

2) Understand the roles and responsibilities of the governing board and identify effective techniques for establishing sound relationships between senior leaders and the board.

3) Understand the purpose and function of each clinical and service department within health care organizations and how they interrelate.

4) Understand how leaders energize stakeholders with the compelling vision that fosters and sustains their shared commitment to organizational goals.

5) Identify and effectively use appropriate communication vehicles based on audience characteristics and communication goals.

**Course Objectives**

Upon completion of the course, students should be able to:

a) Evaluate and understand appropriate techniques for the governing board and governance structures.

b) Demonstrate the variety and complexity of the manager’s role in guiding complex health services organizations, including issues related to motivation, work design, and job satisfaction.

c) Understand the nature of professional work and the unique attributes of managing professional teams and organizations.

d) Describe various perspectives on and dimensions of leadership and be able to diagnose what leadership styles may be most effective given particular situations and circumstances.

e) Be more familiar with their own leadership and behavior style and its implications for effective performance as health services executives.

f) Learn and understand the formal and informal decision making structures and power relationships in health care organizations.

g) Develop management strategies that take into account the power and influence of different professional #s.

h) Diagnose and improve the communication and coordination challenges facing a health services organization.
i) Demonstrate sensitivity and understanding of varied cultural, ethnic, socioeconomic backgrounds of individuals and #s.

j) Effectively manage the complexities of interdepartmental and inter-organizational relations in and among health services organizations.

k) Describe how to build a learning organization through changes in structure, tasks, information sharing, strategy, and culture.

l) Recognize and effectively deal with planned and unplanned change in organizations.

m) Identify and be able to evaluate the functions, structure and performance measures of excellent health care organizations.

**Grading Scale**

**Course Requirements/Evaluation**

*Topic Readings*

Each week’s lecture has assigned chapters from our textbooks. Check the following action plan and the Sakai website for updates on the week’s readings. These additional article readings are designed to round out the topic of discussion for the week and *can* be used to generate discussion from in your discussion boards. Note that you will be responsible for reading this material for your examination but do not have to elect to discuss these in the discussion boards if you are responsible for facilitating that week’s discussion.

Note that the readings ARE subject to change throughout the semester as a measure of keeping the information in this course as current as possible. If these readings change, you will be
advised via a message on Sakai. It is your responsibility to make sure that you are verifying the currency of each week’s readings.

**Discussion Boards Student Participation (10%)**  
Each lecture will have a dedicated discussion board to discuss the articles for that lecture. **During the first week of class, you will be assigned a # and therefore a week to lead the discussion board. Your # will be assigned to lead and facilitate discussion with the class for a specific week. See the next section on Discussion # Lead Role for specifics.**

Participation will earn you 10% for contributing to discussion boards and 10 % for leading discussion board for your assigned week. If you post thought provoking, topical postings, in other words substantive postings, not simply “I agree with what has been stated”, you will receive full points.

**Discussion Week Lead Role (10%)**  
An article will be assigned to one member of the class for class discussion each week. In this role, you are required to provide a summary of the article during the week you are leading the discussion, and you are expected to build on the article from current research, the news, or examples from you work, and finally you are responsible for posting four question(s) related to the article to simulate and lead the discussion. If you have a preferred topic, please let the professor know within the first week of class.

This activity will be within the Discussion Board element in your Sakai course site. Remarks that do not add to the conversation will not be given credit. If you are the discussion post leader you will create new posts; all other students will reply to that original post. Remember, only meaningful, substantive and insightful participation is expected and examples from work experience are highly valued.

**Final Exam (20%)**  
One formal exam will be administered during finals week of the semester. This exam is designed to evaluate if the student has good understanding of management principles and will consist only of essay questions that incorporate what you have learned this semester.

This course will be utilizing the services of ProctorU as the proctoring service for the final exam in this course. This service is a user-friendly system, but you must follow these guidelines to register and take your exams:

1. **Students must register for a time slot for their course exams with ProctorU starting the second week of the semester, but no later than 3 days prior to an exam.** You will register for your exams at [www.proctoru.com](http://www.proctoru.com). Their website will describe how you register and log on for your exam. Your exam will be taken in your Sakai course, but only ProctorU will be able to open the exam for you.

2. **The final exam will be administered 9:00AM – midnight (Eastern time) from Friday to Sunday on the scheduled exam weekend 04/27 – 04/30 (Monday through Thursday of exam week).**

3. Students will need to have a microphone and webcam in place during the test-taking period. An inexpensive webcam and microphone will work fine. ProctorU recommends
the Microsoft LifeCam VX-5000 webcam, but most brands or models will work. This webcam, as well as many newer webcams, comes complete with a microphone in the camera. Students will NOT be allowed to take an exam without a webcam. (Note: a microphone and webcam are program requirements for our online programs, see computer requirements on our program website). Please test your connection and equipment at the ProctorU site PRIOR to your exam date and time.

4. The final exam may be taken at a student’s home, but students must plan to take the exam in an environment where other people are not in the room with the student during the exam. No phones, TVs or radios should be on during the exam.

5. Students will need to have some administrative rights on the computer they are using for the exam to enable the proctoring service to function.

6. When a student registers for an exam, ProctorU fee will be paid by the College. For an exam scheduled less than 3 days before an exam, they will charge a $5 additional fee, which will be the responsibility of the student to pay via US$ credit card at the time of registration (this cannot be waived, so be prepared).

Two Group Written Assignments (20%)
The group written assignment are due by the posted due date, before 11:55 PM as indicated on the schedule. Each assignment is worth 10%. Each of these assignments will be due Sunday evening by 11:55 pm and these are specifically noted on the syllabus calendar (page 10). For these assignments, you will be in teams of two or three individuals, unless the number of students in the course exceed 15. You will be given a team discussion boards to facilitate team meetings, but teams may elect to use other means of communication such as Skype, phone, in person, Drop-box, etc.

Each assignment must be answered in 1000 words or less not including title page or references. Brevity in covering complex issues is an important professional skill. I will discard excess material without reading it if it exceeds this limit. Written assignments are due as an attached Word document- only via the assignment tool. Please include the following information on the document: your names, course title, date, assignment title and number, team number if applicable (professor will assign teams) and word count. Points will be deducted if any of this information is missing. Direct quotations and specific concepts from sources must be footnoted. All assignment submissions will be submitted to Turnitin for plagiarism checking. Please be sure to properly cite your work as needed.

Late submissions. If you will not be turning in your assignment on the day it is due, contact the professor immediately by email. Special arrangements may be possible only under EXTRAORDINARY circumstances. There will be a 10% per day deduction for late work, with a minimum deduction of a half point (0.5). Assignments later than five days from the date due will receive a zero (unless you have received permission from the instructor due to extenuating circumstances.)

Mid-term Paper – 15% - Individual Assignment.

In lieu of a mid-term exam, a paper which reflects on what you have learned thus far in the semester, not to exceed 5 pages. The source material reading for this paper will be the from the
Case study textbook (Kovner) pages 9-35. On page 33 you will find the discussion questions on required reading. Your paper must reflect on these two questions and it is recommended to order them as follows:

Q3: Make the business case for using evidence-based management.
Q2: Develop an action plan for implementing evidence-based management in a large academic medical center.

In this assignment, reflect on what you have learned the first seven weeks of this course. Supplement with other readings. References must include at least five from professional journals and the articles must have been published after the year 2000.

**Final Project (25%)**

A case study will be assigned to the class as the final project. Students will work on this case in a team of three unless there is an even number of class members, which may create a team of 4. The written analysis for the case should be limited to 10 pages. The final report should use double-space, 1-inch margins, and 12 font, and should include a problem statement, analysis (alternative courses of action), and recommendation. See additional guidelines in the Assignment tool under Case Analyses section. Paper should be submitted as a Word attachment via the assignment tool. **Late papers and email submissions will not be accepted.** Please note that students in your # will be evaluating your contribution and work, these evaluations will have a direct impact on your final project grade (please see the evaluation form on p. 9).

Grading for the written assignments and final project:
- > 9.5-10 Reserved for truly exceptional contributions, at a level not normally expected
- 8.5-9.5 Work that is clearly ahead in terms of research, creativity, and effort
- 8.0-8.5 Work that is competitive and consistent with your peers
- 7.0-8.0 Work that is good but could be improved (basically sound ideas but could be better).
- 6.0-7.0 Work that is average and contains some errors
- <6.0 Failure to appropriately complete the assigned case

*Grading rubric used can be found on page 11.*

**How to work as a team in an online course:**

Team or group work in an online course is conducted electronically between you and your partners. Teams should discuss if they want to meet live or if they are content with asynchronous communications. There are several tools that students will be able to use to facilitate this work, such as phone calls, emails, Skype, chat rooms, and discussion boards, feel free to be creative. Each team will have a discussion board that only members of that team can access. Via this discussion board team members will be free to post messages back and forth to each other, share documents, or set up live meeting times. Students may use the chat room in the course site for short meetings, but all students in the course will have access to the chat room. Skype is another great resource. This is a free Internet phone/IM service where team members can meet live to share ideas. And of course there is the common technology method of emailing
each other and calling each other. Choose the tool that works the best for all members of the team.

**Operating Assumptions and Expectations**

Someone who does not understand the “workings” of an automobile engine would have little success in repairing it or improving its performance. Similarly, to manage an organization (or organizational component), you must have a thorough understanding of organizational structure and functioning. This course will provide tools and approaches for assessing organizational problems and designing ways to solve problems and improve organizational performance.

Students will become more effective health services managers if they have a thorough understanding of the unique features of the health services system and health services organizations. The only way to master the learning objectives is to put time and energy into reading, discussion, and writing.

Students are expected to master a variety of words that health care professionals often use to describe what they do (e.g. see the Glossary in the Griffith and White text). Students should recognize these terms, understand their technical implications, and use them appropriately.

In general, clinical terms will not be translated. Students are expected to familiarize themselves with the actual language used by clinicians. The MedlinePlus website is available 24 hours a day, seven days a week here: [http://www.nlm.nih.gov/medlineplus/mplusdictionary.html](http://www.nlm.nih.gov/medlineplus/mplusdictionary.html)

**Statement of University’s Honesty Policy (cheating and use of copyrighted materials)**

Students are expected to act in accordance with the University of Florida policy on academic integrity (see Graduate Student Handbook for details). Cheating or plagiarism in any form is unacceptable and inexcusable behavior.

*We, the members of the University of Florida community,*

*pledge to hold ourselves and our peers to the highest standards of honesty and integrity.*

**Policy Related to Class Attendance or Other Work**

Students are expected to view all the lectures, read the assigned text and articles, be an active member of their #, and to actively participate in class discussions. Personal issues with respect to class participation or fulfillment of course requirements will be handled on an individual basis.

**Statement Related to Accommodations for Students with Disabilities**

Students requesting exam accommodations must first register with the Dean of Students Office, which will provide documentation to the student. The student should then provide this documentation to the instructor and Susan White, the online administrator at swhite@ufl.edu.

Purpose of the Final Project

The final group project provides the “real-world” experience of working in a team to successfully determine solutions to complex problems. In addition, this project is health care-specific and represents a situation that you may someday face in your career as a health care executive.

One important fact to keep in mind as you prepare a case is that there is no one right answer. Some approaches may work better than others, but there are multiple ways to arrive at a solution to a problem. The critical issue in presenting your findings is to be able to make a cogent argument for the approach you suggest.

A secondary, but still important, purpose of the case analysis is to provide an opportunity for you and your team members to present analyses as if you were consultants communicating your findings and recommendations to senior management of the organization in the case study.

How to Prepare for Writing a Case

Here are some suggested steps to take as you prepare the case.

1. **Read the case just to get an overall idea** about the setting, topic, and problem.
2. **Re-read the case and pull out important facts** that may be used to help analyze possible courses of action.
3. **Identify the major problems** in terms of importance.
4. **Identify the root cause of the problem and the factors that contributed to the problem**
5. **Identify alternative courses of action, including constraints on the alternatives.**
   You should identify the assumptions you made about the problem and about implementing the alternatives.
6. **Develop criteria for judging a proposed course of action for each problem**
7. **Select a preferred course of action and defend it**, based upon the criteria you developed.

It may be useful, when assigned a role in the case, to first make assumptions about the priorities of the constituencies represented (or the clients who have hired you). In other words, what would they like to gain in the situation as presented?

The case is intended to give your group the opportunity to apply the concepts most recently covered in class. Feel free, however, to use any of the concepts covered to date as well.

INSTRUCTIONS: Grade each team member (including yourself) on attributes I through III using letter grades A through F. For attribute IV, rank each member (including yourself), with 1 being the person who made the most important contribution to the team project. You may provide additional comments on the bottom of this page.

DEFINITIONS
I. Commitment to Team Excellence - cooperativeness; receptiveness to criticisms or suggestions; ability to work with others.
II. Originality and Initiative - creative ability; imagination; soundness of ideas.
III. Dependability - ability to get results; reliability; promptness; attendance.
IV. Overall Contribution - overall contribution to the team’s project.
